

ATTACHMENT III SCHEDULE OF PERFORMANCE MEASURES Childhood Indicators - Ages 12 Months Through 18 Years

Note: This schedule outlines the HEDIS[®] ¹ performance measures to be reported by health plans during the term of this contract. The descriptions below are intended to be a summary only and are not meant to be a comprehensive description of the HEDIS[®] measures. Plans are expected to follow the specifications found in the 20~~12~~~~10~~-HEDIS[®] Technical Specifications.

For the 20~~11-12~~~~10-11~~ contract period, all plans must report a separate rate for each geographic region in which the plan provides coverage. For HEDIS measures collected using the Hybrid Method, a separate sample must be drawn for each geographic region in which the plan provides coverage.

FOR THE 20~~11-12~~~~10-11~~ CONTRACT PERIOD [NOTE: THE AND FORMATTING OF THE MEASURES HAS BEEN CHANGED]

1. CHILDHOOD IMMUNIZATION STATUS (CIS)

The percentage of HFP enrolled children who turned two years old during the measurement year, were continuously enrolled for 12 months immediately preceding their second birthday with no more than one gap in enrollment of up to 45 days, and received the following immunizations on or before their second birthday:

- Four DTaP, DT or individual diphtheria and tetanus (DTaP) vaccinations.
- Three polio (IPV) vaccinations.
- One measles, mumps, and rubella (MMR) vaccination.
- Three H influenza type B (HiB) vaccinations.
- Three hepatitis B vaccinations.
- One chicken pox (VZV) vaccination.
- Four pneumococcal conjugate vaccinations.
- Two hepatitis A vaccinations.
- Three rotavirus vaccinations.
- Two influenza vaccinations.
- A combined rate including children who have received all of the above immunizations.

2. IMMUNIZATIONS IN ADOLESCENTS (IMA)

The percentage of HFP adolescents who turned thirteen years old during the measurement year, were continuously enrolled for 12 months immediately preceding their thirteenth birthday with no more than one gap in enrollment of up to

¹ HEDIS[®] is a registered trademark of the National Committee for Quality Assurance (NCQA).

45 days, and received the following immunizations on or before their thirteenth birthday:

- One meningococcal conjugate or meningococcal polysaccharide vaccine.
- One tetanus, diphtheria toxoids and acellular pertussis vaccine (Tdap) or one tetanus, diphtheria toxoids vaccine (Td).
- A combined rate including adolescents who received all of the above immunizations.

3. *LEAD SCREENING IN CHILDREN (LSC)*

The percentage of HFP enrolled children who received at least one capillary or venous lead screening test on or before their second birthday.

4. *CHILDREN AND ADOLESCENTS' ACCESS TO PRIMARY CARE PRACTITIONERS (CAP)*

The percentage of HFP enrolled children who had at least one visit to a pediatrician, family physician, or other health care provider during the measurement year. Four separate cohorts are reported:

- Cohort 1: Children age 12 through 24 months who were continuously enrolled during the measurement year.
- Cohort 2: Children age 25 months through 6 years who were continuously enrolled during the measurement year.
- Cohort 3: Children age 7 through 11 years who were continuously enrolled during the measurement year and the prior year.
- Cohort 4: Adolescents age 12 through 18 years who were continuously enrolled during the measurement year and the prior year.

5. *WELL-CHILD VISITS IN THE FIRST 15 MONTHS OF LIFE (W15)*

The percentage of HFP enrolled children who turned 15 months old during the measurement year and received zero, one, two, three, four, five, or six or more well-child visits with a primary care practitioner during their first 15 months of life. Each eligible child is included in only one numerator (e.g., a child receiving six well-child visits would not be included in the rate for five or fewer visits.)

6. *WELL- CHILD VISIT IN THE THIRD, FOURTH, FIFTH, AND SIXTH YEARS OF LIFE (W34)*

The percentage of HFP enrolled children age 3 through 6 years who were continuously enrolled during the measurement year with no more than one gap in enrollment of up to 45 days and received one or more well-child visits with a primary care provider during the measurement year.

7. *ADOLESCENT WELL-CARE VISITS (AWC)*

The percentage of HFP enrolled adolescents age 12 through 18 years who were continuously enrolled during the measurement year with no more than one gap in enrollment of up to 45 days and received at least one comprehensive well-care visit with a primary care provider during the measurement year.

8. *USE OF APPROPRIATE MEDICATIONS FOR ASTHMA (ASM)*

The percentage of HFP enrolled children age 5 through 18 years who were identified as having persistent asthma and were appropriately prescribed medication during the measurement year.

9. *APPROPRIATE TREATMENT FOR CHILDREN WITH UPPER RESPIRATORY INFECTION (URI)*

The percentage of HFP enrolled children age 3 months through 18 years during the measurement year who were given a diagnosis of upper respiratory infection and were not dispensed an antibiotic prescription on or three days after the episode date.

10. *APPROPRIATE TESTING FOR CHILDREN WITH PHARYNGITIS (CWP)*

The percentage of HFP enrolled children age 2 through 18 years during the measurement year who were diagnosed with pharyngitis, prescribed an antibiotic and received a group A streptococcus (strep) test for the episode.

11. *CHLAMYDIA SCREENING IN WOMEN (CHL)*

The percentage of HFP enrolled women age 16 through 18 years who were identified as sexually active, were continuously enrolled during the measurement year with no more than one gap in enrollment of up to 45 days, and had at least one test for chlamydia during the measurement year.

12. *IDENTIFICATION OF ALCOHOL AND OTHER DRUG SERVICES (IAD)*

The number and percentage of HFP enrolled members, by age and sex, who received alcohol and other drug services during the measurement year in four categories:

- Any chemical dependency services (inpatient, intermediate or ambulatory).
- Inpatient chemical dependency services.
- Intermediate chemical dependency services.
- Ambulatory chemical dependency services.

13. *MENTAL HEALTH UTILIZATION (MPT)*

The number and percentage of HFP enrolled members, by age and sex, who received mental health services during the measurement year in four categories of service:

- Any mental health services (inpatient, intermediate or ambulatory).
- Inpatient mental health services.
- Intermediate mental health services.
- Ambulatory mental health services.
